## About us

Our course of music, art and theatre was founded over 35 years ago.

We believe that even the most motivated children engaged in the study of a musical instrument during the school year cannot necessarily commit themselves in full, be it due to challenging schedules, or a difficulty to focus on a single activity among the many stimuli received.

We offer a unique opportunity, for two uninterrupted weeks, to allow your children to immerse in music among similarly motivated youths, and pursue their own individual challenges under the tutelage of an international team of experienced teachers and performers. Art and theatre workshops complement individual, group and choral music lessons for those seeking additional creative avenues. We look forward to seeing and hearing you soon!
